Why Vascular Health Matters

Your vascular system has 60,000 miles of blood vessels—including arteries, veins, and tiny capillaries.

This affects every aspect of your health. Every organ and system in your body depends upon proper blood flow.

6 Reasons To Care for Your Arteries

More Youthful Appearance

With proper blood flow, your skin, hair, and eyes will have better color and health.

Arterial Elasticity

Hardened arteries are a threat to your heart, while increased elasticity is protective.

Greater Comfort

Improved blood flow means warmer hands and feet.

Clearer Thinking

Optimum brain function depends on proper blood flow. Proper blood flow is only possible with a healthy endothelial glycocalyx.

Energy and Performance

Improved nutrient delivery enhances cells' ability to make energy.

Sexual Vitality

Blood flow is the key to lasting sexual health.

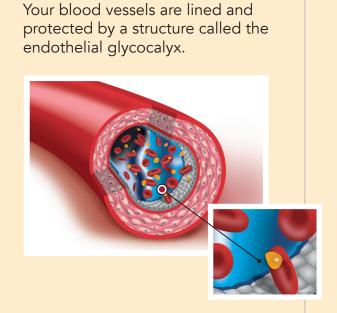

Ask your health care practitioner if Arterosil[®] is the right choice for you.

You're in control

Improve your blood flow by protecting your glycocalyx. You can protect and restore your glycocalyx with a healthy diet, regular exercise, and special nutrients.

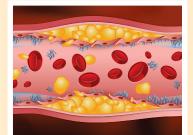

Protect the Protector

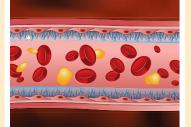

The Protector

Taking care of your endothelial glycocalyx is essential for your health. This slippery-smooth inner lining stops cholesterol from penetrating your artery walls—the first step in plaque development.

Arterosil is clinically proven to protect and restore the endothelial glycocalyx.

Compromised Glycocalyx

Healthy Glycocalyx

Arterosil is the only glycocalyxregenerating product patented to stabilize and regress vulnerable plaque.*

Ask your health care practitioner if Arterosil[®] is the right choice for you.
